

The software development teams are going to present the first phase of their projects on 21th of November. All the required outputs for the first phase are given below. You may add extra outputs to support your projects.

For Agile Teams:

1. At least one well-defined user story and its related scenarios
2. Project backlog document with task priorities and their rationales
3. Use case diagram(s) for the defined scenarios
4. Dummy/Simulated Graphical Interface
5. Documented Test Cases or Generated Unit Tests

For Other Teams

1. A well-defined and structured system requirements document
2. Use case diagram(s) for the first prototype
3. Dummy/Simulated Graphical Interface
4. Documented Test Cases or Generated Unit Tests

Each team will have only 10 minutes to answer our questions. All the team members must be ready on their online evaluation period. You do not need to have a presentation file but if you find it useful you may prepare one. The presentation will be offline and within two sessions.

Important Note: You will be informed about the presentation schedule on 19th of the November and we will not change this schedule once declared. You will be at classroom during your session.

Important Dates

Deadline to submit related documents: **18th of November - 23.59**

Presentation of the projects: **21th of November [13.30 – 16.30].**
